DETAILED ACTION

Response to Arguments

Applicant's arguments, see amendment, filed 2/23/2006, with respect to the independent claims 1 and 25 have been fully considered and are persuasive. The rejection of claims 1-15 and 25-35 have been withdrawn.

Applicant's arguments, see amendment, filed 2/23/2006, with respect to the rejection(s) of claim(s) 16 and 23-24 under Bresina (US 5,741,256) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Schavan et al. (cited by the examiner in the previous Office Action).

See rejection below.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16, and 23-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bresina '256 in view of Schavan et al. '785. Bresina discloses a device having an implant (Fig. 1), a shaft (16) defining a longitudinal axis as the non-bladed portion, a plurality of blades (10 and 12) that are helically twisted (Col. 2, lines 26) that define an outer diameter, and wherein the implant is configured and dimensioned for implantation

Art Unit: 3733

into a femoral head (see Fig. 3), and that has a cannula along the longitudinal axis that is capable of receiving a guidewire.

Bresina discloses the claimed invention except for a bladed portion that has a smaller maximum outer diameter than maximum outer diameter of the non-bladed portion. Schavan et al. disclose a bladed portion with a smaller maximum outer diameter than the non-bladed portion (see profile of Fig. 1). It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the device of Bresina having at least a bladed portion with a smaller maximum outer diameter than the non bladed portion in view of Schavan et al. (See Col. 2, lines 35-41) to better fit the implant in the femoral socket.

Allowable Subject Matter

Claims 1-15, and 25-35 are allowed.

Claims 17-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3733

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
